It is regretiable that such a situation was ever brought on, but not much can be done about it now. flat on one's face

"Know-how" is a popular phrase in these times — the western nations' Industrial know-how is said to be their greatest hope. But it is not enough to know how to do a job. Doing it is what counts. Between knowing and doing there are usually a surprising number of opportunities for falling flat on one's face.

The textile industry in Canada, of which Dominion Textile is a part, has been practising for over a century to avoid falling flat on its face. While learning its fob and doing it, the industry has become the largest emplayer of manufacturing labor in Canada and the payer of the largest menufacturing wage bill.
